

"The Truth About Vaping"

Community Presentation Through Mansfield Public Schools

Wednesday, October 10, 2018 from 6:30-8:00pm
Qualters Middle School Auditorium - 240 East Street

Caron Treatment Centers' Student Assistance Program will provide an educational presentation on vaping and e-cigarettes open to any parents/community members in Mansfield. This program is intended for an adult-audience.

"Vaping" is a term used to refer to any electronic vaporizer, also known as E-cigs, vapes, vape pens and E-hookahs. Though originally designed as harm reduction products for smokers, they have morphed into a trend that is popular with youth. This rise in use is of concern for health professionals, educators and parents; in part because of the common misconception that these products are harmless and because long-term consequences are still not known.

Presentation Objectives:

- Provide information on the effects and consequences of electronic vaping products
- Empower parents and community members with effective communication skills when talking with young people
- Review the importance of establishing clear rules and consequences at home regarding substance use
- Evaluate resiliency factors that help protect young people from substance use
- Provide local resources should community members require addiction support

This program is sponsored by the QMS PAC
